Apparently I introduced a bug whereby no change in SSN on the UD caused a substitute SSN to be sent instead. Hence, the UD was returned in error. This will require a fix.

Would you like to jump back to Driver I? I deployed a fix for the NI so I should be able to retry test I3.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Apparently I introduced a bug whereby no change in SSN on the UD caused a substitute SSN to be sent instead. Hence, the UD was returned in error. This will require a fix.

Would you like to jump back to Driver I? I deployed a fix for the NI so I should be able to retry test I3.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Apparently I introduced a bug whereby no change in SSN on the UD caused a substitute SSN to be sent instead. Hence, the UD was returned in error. This will require a fix.

Would you like to jump back to Driver I? I deployed a fix for the NI so I should be able to retry test I3.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

The pointer has been deleted.

The H7 validation returned errors **NO MATCHING CONVICTION ID CODE IN H3 MESSAGE** and **REPEATED CONVICTION IDS IN CONVICTIONS LINKS GRP** although I would have to examine H7/H3/H5 to see exactly what was amiss.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Apparently I introduced a bug whereby no change in SSN on the UD caused a substitute SSN to be sent instead. Hence, the UD was returned in error. This will require a fix.

Would you like to jump back to Driver I? I deployed a fix for the NI so I should be able to retry test I3.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

The pointer has been deleted.

The H7 validation returned errors NO MATCHING CONVICTION ID CODE IN H3 MESSAGE and REPEATED CONVICTION IDS IN CONVICTIONS LINKS GRP although I would have to examine H7/H3/H5 to see exactly what was amiss.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Apparently I introduced a bug whereby no change in SSN on the UD caused a substitute SSN to be sent instead. Hence, the UD was returned in error. This will require a fix.

Would you like to jump back to Driver I? I deployed a fix for the NI so I should be able to retry test I3.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Apparently I introduced a bug whereby no change in SSN on the UD caused a substitute SSN to be sent instead. Hence, the UD was returned in error. This will require a fix.

Would you like to jump back to Driver I? I deployed a fix for the NI so I should be able to retry test I3.

Apparently I introduced a bug whereby no change in SSN on the UD caused a substitute SSN to be sent instead. Hence, the UD was returned in error. This will require a fix.

Would you like to jump back to Driver I? I deployed a fix for the NI so I should be able to retry test I3.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Apparently I introduced a bug whereby no change in SSN on the UD caused a substitute SSN to be sent instead. Hence, the UD was returned in error. This will require a fix.

Would you like to jump back to Driver I? I deployed a fix for the NI so I should be able to retry test I3.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Apparently I introduced a bug whereby no change in SSN on the UD caused a substitute SSN to be sent instead. Hence, the UD was returned in error. This will require a fix.

Would you like to jump back to Driver I? I deployed a fix for the NI so I should be able to retry test I3.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Apparently I introduced a bug whereby no change in SSN on the UD caused a substitute SSN to be sent instead. Hence, the UD was returned in error. This will require a fix.

Would you like to jump back to Driver I? I deployed a fix for the NI so I should be able to retry test I3.

This email comes from an external source, so remember, Think Before You Click!  
Gary,

I see that H1, H2 and H3 were with "INVALID SYSTEM RELEASE CODE " error. This has been fixed. Can we do the CSOR again? Please delete the pointer and I will re-add .

Also, what errors did you encountered with H7 linkages?

Please let me know.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

The CSOR completed although there were errors encountered with the H7 linkages. A UD message was sent back with the errors, which I gather is incorrect. Let me know your expectations on how this should have been handled.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Apparently I introduced a bug whereby no change in SSN on the UD caused a substitute SSN to be sent instead. Hence, the UD was returned in error. This will require a fix.

Would you like to jump back to Driver I? I deployed a fix for the NI so I should be able to retry test I3.

Welcome back Mina,

To clarify, the test instruction is asking to add a pointer using doc type = 2. We already have a doc type = 1 pointer from a previous CSOR.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

The pointer has been deleted.

The H7 validation returned errors NO MATCHING CONVICTION ID CODE IN H3 MESSAGE and REPEATED CONVICTION IDS IN CONVICTIONS LINKS GRP although I would have to examine H7/H3/H5 to see exactly what was amiss.

This email comes from an external source, so remember, Think Before You Click!  
Gary,

I see that H1, H2 and H3 were with "INVALID SYSTEM RELEASE CODE " error. This has been fixed. Can we do the CSOR again? Please delete the pointer and I will re-add .

Also, what errors did you encountered with H7 linkages?

Please let me know.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Apparently I introduced a bug whereby no change in SSN on the UD caused a substitute SSN to be sent instead. Hence, the UD was returned in error. This will require a fix.

Would you like to jump back to Driver I? I deployed a fix for the NI so I should be able to retry test I3.

Good Morning Mina,

I wanted to check with you about the PRC and the CDLIS WG Meeting Invite. You did mention during our last PRC call that you did not have these meetings on your calendar. I do see you part of both of these meeting series. If you still don't see these on your calendar, I could send the invite to you again. Please do let me know.

Thanks,  
Madhu

Yes, that will be a problem until we can resolve this issue internally. Hopefully I can make progress on the analysis today.

I am going to need to end testing today to address other issues. Can we pick this up again tomorrow?

I will fix the Driver K UD failure. And I will wait until I hear from you before making any changes to UC per the Driver I DDVSS6 issue.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

On the mainframe I was not allowed to enter restriction N to the class C permit upon creation. However, I was able to subsequently update the driver and add restriction N to the permit.

This is probably another topic to discuss with Mina to help determine the intent. There is also a possibility I've created the driver incorrectly. Sorry I could not be more definite.

**To:** 'Syeda, Asma' <[ASyeda@aamva.org](mailto:ASyeda@aamva.org)>

**Cc:** Mina Peters, AK Dept. of Administration <[mina.peters@alaska.gov](mailto:mina.peters@alaska.gov)>; Singaraju, Sruti <[ssingaraju@aamva.org](mailto:ssingaraju@aamva.org)>  
**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

Upon adding the additional permit endorsements and restrictions, the system prevents adding the N restriction for a class C. The validation only allows N restriction on class A or B. This is contrary to the specifications reference you have provided so this is likely a bug in our system, which I will need to confirm. To your knowledge, would restriction N only be allowed for a class C?

**NCB Block**

But, as per the following section in the SPEXS Master Specification, if errors are encountered on the H1 through H7 messages, the Inquirer can return the parent message with the error block(s) explaining the error on the H1 through H7 messages or return the H1 through H7 messages with the error block(s) explaining the error

### CDM1.3.1 Transmission

**CDM1.3 TRANSMISSION**

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,  
or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,  
or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,  
or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),  
or

manually notify the SOR/Old SOR of the error.

Can you please look.

Thanks,  
Asma

This email comes from an external source, so remember, Think Before You Click!  
Gary,

I see that H1, H2 and H3 were with "INVALID SYSTEM RELEASE CODE " error. This has been fixed. Can we do the CSOR again? Please delete the pointer and I will re-add .

Also, what errors did you encountered with H7 linkages?

Please let me know.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

The CSOR completed although there were errors encountered with the H7 linkages. A UD message was sent back with the errors, which I gather is incorrect. Let me know your expectations on how this should have been handled.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Apparently I introduced a bug whereby no change in SSN on the UD caused a substitute SSN to be sent instead. Hence, the UD was returned in error. This will require a fix.

Would you like to jump back to Driver I? I deployed a fix for the NI so I should be able to retry test I3.

**CDM1.3 TRANSMISSION**

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,  
or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,  
or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,  
or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),  
or

manually notify the SOR/Old SOR of the error.

Ok, thanks. It wasn't clear to me on the mainframe as the creation of an IC class produced the error that P and X restrictions are required although I was able to go back in the DS screen and add in the N. Probably user confusion on my part.

Hi Gary,

Yes, please allow for a restriction N. On the mainframe it's added as a regular restriction, and it is allowed.

Regards,

Yes, that will be a problem until we can resolve this issue internally. Hopefully I can make progress on the analysis today.

I am going to need to end testing today to address other issues. Can we pick this up again tomorrow?

I will fix the Driver K UD failure. And I will wait until I hear from you before making any changes to UC per the Driver I DDVSS6 issue.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

On the mainframe I was not allowed to enter restriction N to the class C permit upon creation. However, I was able to subsequently update the driver and add restriction N to the permit.

This is probably another topic to discuss with Mina to help determine the intent. There is also a possibility I've created the driver incorrectly. Sorry I could not be more definite.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

Upon adding the additional permit endorsements and restrictions, the system prevents adding the N restriction for a class C. The validation only allows N restriction on class A or B. This is contrary to the specifications reference you have provided so this is likely a bug in our system, which I will need to confirm. To your knowledge, would restriction N only be allowed for a class C?

**Cc:** Singaraju, Sruti  
**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Thank you – yes, I understand. But we wouldn't ever add a permit pointer instead as an ID pointer, so I wanted to clarify that.

However, that does bring up a good point to question with AAMVA. Do we have any test cases on here that do test the scenario of a record that has AK create both a DL pointer and an ID pointer – then another state does a CSOR of the DL but not the ID (and visa versa)?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Apparently I introduced a bug whereby no change in SSN on the UD caused a substitute SSN to be sent instead. Hence, the UD was returned in error. This will require a fix.

Would you like to jump back to Driver I? I deployed a fix for the NI so I should be able to retry test I3.

Thank you – yes, I understand. But we wouldn't ever add a permit pointer instead as an ID pointer, so I wanted to clarify that.

However, that does bring up a good point to question with AAMVA. Do we have any test cases on here that do test the scenario of a record that has AK create both a DL pointer and an ID pointer – then another state does a CSOR of the DL but not the ID (and visa versa)?

The CSOR completed although there were errors encountered with the H7 linkages. A UD message was sent back with the errors, which I gather is incorrect. Let me know your expectations on how this should have been handled.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Apparently I introduced a bug whereby no change in SSN on the UD caused a substitute SSN to be sent instead. Hence, the UD was returned in error. This will require a fix.

Would you like to jump back to Driver I? I deployed a fix for the NI so I should be able to retry test I3.

Thank you – yes, I understand. But we wouldn't ever add a permit pointer instead as an ID pointer, so I wanted to clarify that.

However, that does bring up a good point to question with AAMVA. Do we have any test cases on here that do test the scenario of a record that has AK create both a DL pointer and an ID pointer – then another state does a CSOR of the DL but not the ID (and visa versa)?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Welcome back Mina,

To clarify, the test instruction is asking to add a pointer using doc type = 2. We already have a doc type = 1 pointer from a previous CSOR.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

The pointer has been deleted.

The H7 validation returned errors NO MATCHING CONVICTION ID CODE IN H3 MESSAGE and REPEATED CONVICTION IDS IN CONVICTIONS LINKS GRP although I would have to examine H7/H3/H5 to see exactly what was amiss.

This email comes from an external source, so remember, Think Before You Click!

Gary,

I see that H1, H2 and H3 were with "INVALID SYSTEM RELEASE CODE " error. This has been fixed. Can we do the CSOR again? Please delete the pointer and I will re-add .

Also, what errors did you encountered with H7 linkages?

Please let me know.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Apparently I introduced a bug whereby no change in SSN on the UD caused a substitute SSN to be sent instead. Hence, the UD was returned in error. This will require a fix.

Would you like to jump back to Driver I? I deployed a fix for the NI so I should be able to retry test I3.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Hi Mina,

Yes, we did had a scenario where AI adds a non-CDL pointer with Sate Document Type as '1', '2' and '3' in Driver B, Test Cases # B4/B5/B6, and Pseudo State P3 initiates CSOR for the pointer with State Document Type '1'.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Thank you – yes, I understand. But we wouldn't ever add a permit pointer instead as an ID pointer, so I wanted to clarify that.

However, that does bring up a good point to question with AAMVA. Do we have any test cases on here that do test the scenario of a record that has AK create both a DL pointer and an ID pointer – then another state does a CSOR of the DL but not the ID (and visa versa)?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Welcome back Mina,

To clarify, the test instruction is asking to add a pointer using doc type = 2. We already have a doc type = 1 pointer from a previous CSOR.

Gary,

When the IN message was sent initially, it was sent with Last Name as 'AIAAIS2SEXCHGDRIVERK'.

Driver K's last name is 'AIS2SEXCHGDRIVERK'.

Thanks,  
Asma

NCB Block

But, as per the following section in the SPEXS Master Specification, if errors are encounters on the H1 through H7 messages,  
the Inquirer can return the parent message with the error block(s) explaining the error on the H1 through H7 messages  
or return the H1 through H7 messages with the error block(s) explaining the error

### CDM1.3.1 Transmission

**CDM1.3 TRANSMISSION**

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,  
or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,  
or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,  
or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),  
or

manually notify the SOR/Old SOR of the error.

Can you please look.

Thanks,  
Asma

**CDM1.3 TRANSMISSION**

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,  
or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,  
or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,  
or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),  
or

manually notify the SOR/Old SOR of the error.

**From:** Tancik, Gary (DOA sponsored)  
**Sent:** Thursday, July 27, 2017 8:57 AM  
**To:** Syeda, Asma  
**Cc:** Singaraju, Sruti; Peters, Mina L (DOA)  
**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

The intention was to return the H7 with the errors but there is a bug that will require a fix. Did you want to stop with Driver K scenario until this can be addressed?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

I inadvertently sent a UA instead of the UD. Which is resulting in receiving an NA. Is it appropriate for me to just delete the pointer or is there anything further necessary to resolve the possible duplicate?

## NCB Block

**CDM1.3 TRANSMISSION**

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,  
or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,  
or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,  
or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),  
or

manually notify the SOR/Old SOR of the error.

---

NCB Block

But, as per the following section in the SPEXS Master Specification, if errors are encountered on the H1 through H7 messages, the Inquirer can return the parent message with the error block(s) explaining the error on the H1 through H7 messages or return the H1 through H7 messages with the error block(s) explaining the error

### CDM1.3.1 Transmission

SPEXS Master Specification (AMIE), r6.0.9

AAMVA - Official Use Only

#### CDM1.3 TRANSMISSION

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error, or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error, or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message, or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s), or

manually notify the SOR/Old SOR of the error.

Can you please look.

Thanks,  
Asma

This email comes from an external source, so remember, Think Before You Click!  
Gary,

I see that H1, H2 and H3 were with "INVALID SYSTEM RELEASE CODE " error. This has been fixed. Can we do the CSOR again? Please delete the pointer and I will re-add .

Also, what errors did you encountered with H7 linkages?

Please let me know.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

The CSOR completed although there were errors encountered with the H7 linkages. A UD message was sent back with the errors, which I gather is incorrect. Let me know your expectations on how this should have been handled.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Apparently I introduced a bug whereby no change in SSN on the UD caused a substitute SSN to be sent instead. Hence, the UD was returned in error. This will require a fix.

Would you like to jump back to Driver I? I deployed a fix for the NI so I should be able to retry test I3.

**CDM1.3 TRANSMISSION**

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,  
or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,  
or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,  
or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),  
or

manually notify the SOR/Old SOR of the error.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

The next test K6 is asking for a new pointer using doc type = 2 with the expectation an NA will be produced (with subsequent mark unique, etc). Would it be possible to add an ID pointer instead to exercise the possible duplicate scenario?

This email comes from an external source, so remember, Think Before You Click!

Gary,

We can continue with Driver K and come back to this Test Case once the issue is fixed and re-test.

Let me know if this is ok with you.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

The intention was to return the H7 with the errors but there is a bug that will require a fix. Did you want to stop with Driver K scenario until this can be addressed?

NCB Block

But, as per the following section in the SPEXS Master Specification, if errors are encountered on the H1 through H7 messages, the Inquirer can return the parent message with the error block(s) explaining the error on the H1 through H7 messages or return the H1 through H7 messages with the error block(s) explaining the error

### CDM1.3.1 Transmission

SPEXS Master Specification (AMIE), r6.0.9

AAMVA - Official Use Only

#### CDM1.3 TRANSMISSION

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error, or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error, or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message, or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s), or

manually notify the SOR/Old SOR of the error.

Can you please look.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Apparently I introduced a bug whereby no change in SSN on the UD caused a substitute SSN to be sent instead. Hence, the UD was returned in error. This will require a fix.

Would you like to jump back to Driver I? I deployed a fix for the NI so I should be able to retry test I3.

## NCB Block

**CDM1.3 TRANSMISSION**

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,  
or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,  
or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,  
or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),  
or

manually notify the SOR/Old SOR of the error.

---

**Sent:** Thursday, July 27, 2017 9:04 AM  
**To:** Syeda, Asma  
**Cc:** Singaraju, Sruti; Peters, Mina L (DOA)  
**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

The next test K6 is asking for a new pointer using doc type = 2 with the expectation an NA will be produced (with subsequent mark unique, etc). Would it be possible to add an ID pointer instead to exercise the possible duplicate scenario?

---

## NCB Block

**CDM1.3 TRANSMISSION**

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,  
or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,  
or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,  
or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),  
or

manually notify the SOR/Old SOR of the error.

---

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

The next test K6 is asking for a new pointer using doc type = 2 with the expectation an NA will be produced (with subsequent mark unique, etc). Would it be possible to add an ID pointer instead to exercise the possible duplicate scenario?

---

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Apparently I introduced a bug whereby no change in SSN on the UD caused a substitute SSN to be sent instead. Hence, the UD was returned in error. This will require a fix.

Would you like to jump back to Driver I? I deployed a fix for the NI so I should be able to retry test I3.

## NCB Block

**CDM1.3 TRANSMISSION**

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,  
or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,  
or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,  
or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),  
or

manually notify the SOR/Old SOR of the error.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

The next test K6 is asking for a new pointer using doc type = 2 with the expectation an NA will be produced (with subsequent mark unique, etc). Would it be possible to add an ID pointer instead to exercise the possible duplicate scenario?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

The intention was to return the H7 with the errors but there is a bug that will require a fix. Did you want to stop with Driver K scenario until this can be addressed?

---

NCB Block

But, as per the following section in the SPEXS Master Specification, if errors are encountered on the H1 through H7 messages, the Inquirer can return the parent message with the error block(s) explaining the error on the H1 through H7 messages or return the H1 through H7 messages with the error block(s) explaining the error

### CDM1.3.1 Transmission

**CDM1.3 TRANSMISSION**

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,  
or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,  
or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,  
or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),  
or

manually notify the SOR/Old SOR of the error.

Can you please look.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Apparently I introduced a bug whereby no change in SSN on the UD caused a substitute SSN to be sent instead. Hence, the UD was returned in error. This will require a fix.

Would you like to jump back to Driver I? I deployed a fix for the NI so I should be able to retry test I3.

## NCB Block

**CDM1.3 TRANSMISSION**

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,  
or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,  
or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,  
or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),  
or

manually notify the SOR/Old SOR of the error.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

The next test K6 is asking for a new pointer using doc type = 2 with the expectation an NA will be produced (with subsequent mark unique, etc). Would it be possible to add an ID pointer instead to exercise the possible duplicate scenario?

NCB Block

But, as per the following section in the SPEXS Master Specification, if errors are encountered on the H1 through H7 messages, the Inquirer can return the parent message with the error block(s) explaining the error on the H1 through H7 messages or return the H1 through H7 messages with the error block(s) explaining the error

### CDM1.3.1 Transmission

**CDM1.3 TRANSMISSION**

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,  
or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,  
or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,  
or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),  
or

manually notify the SOR/Old SOR of the error.

Can you please look.

Thanks,  
Asma

## NCB Block

**CDM1.3 TRANSMISSION**

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,  
or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,  
or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,  
or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),  
or

manually notify the SOR/Old SOR of the error.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Gary,

As per Test Case # K6, AI initiates an Add Driver request that must contain information to create a duplicate pointer (CDLIS Indicator as 'Y' ) with the driver from Test Case # K5.

You have added a non-CDL pointer that has resulted in 'Type 7' duplicate.

The main intent of this Test Case is to make sure AI can send a Mark Unique Transaction to resolve the Duplicate when both the drivers belong to AI.

Can you please look.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

The next test K6 is asking for a new pointer using doc type = 2 with the expectation an NA will be produced (with subsequent mark unique, etc). Would it be possible to add an ID pointer instead to exercise the possible duplicate scenario?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

The pointer has been deleted.

The H7 validation returned errors NO MATCHING CONVICTION ID CODE IN H3 MESSAGE and REPEATED CONVICTION IDS IN CONVICTIONS LINKS GRP although I would have to examine H7/H3/H5 to see exactly what was amiss.

This email comes from an external source, so remember, Think Before You Click!  
Gary,

I see that H1, H2 and H3 were with "INVALID SYSTEM RELEASE CODE " error. This has been fixed. Can we do the CSOR again? Please delete the pointer and I will re-add .

Also, what errors did you encountered with H7 linkages?

Please let me know.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Apparently I introduced a bug whereby no change in SSN on the UD caused a substitute SSN to be sent instead. Hence, the UD was returned in error. This will require a fix.

Would you like to jump back to Driver I? I deployed a fix for the NI so I should be able to retry test I3.

#### NCB Block

**CDM1.3 TRANSMISSION**

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,  
or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,  
or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,  
or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),  
or

manually notify the SOR/Old SOR of the error.

**Subject:** AK (AI) SSOLV testing

Hi Gary,

Please be informed that SSA has added AI as an alternate gap code for SSOLV application.

Thanks,  
Fatima

**To:** 'Gary Tancik'  
**Cc:** Rangaraju, Nalini; Zaidi, Nadeem  
**Subject:** ~~AK~~ SSOLV testing

Hi Gary,

This is Fatima from AAMVA verification systems QA team. We came to know that ~~AK~~ **AK** is going through system rewrite. The alternate gap code ~~AK~~ **AK** will be using is ~~AK~~ **AK**. Please confirm.

Please be informed that there is a SSOLV test environment. I am in a process of authorizing ~~AK~~ **AK** to NCS and UNI for accessing SSOLV from the new gap code AI.

We will reach out to SSA and have them authorize AI in their test env so that ~~AK~~ **AK** can send SSOLV message all the way to SSA even with the alternate gap code. If anything changes, I will keep you posted.

Once the setup is all completed, my colleague Nadeem will assist you in testing as per your convenient. He will share with you the test plan as well.

Please let us know of any question.

Thanks,  
Fatima Farzana

This email comes from an external source, so remember, Think Before You Click!  
Gary,

As per Test Case # K6, AI initiates an Add Driver request that must contain information to create a duplicate pointer (CDLIS Indicator as 'Y' ) with the driver from Test Case # K5.

You have added a non-CDL pointer that has resulted in 'Type 7' duplicate.

The main intent of this Test Case is to make sure AI can send a Mark Unique Transaction to resolve the Duplicate when both the drivers belong to AI.

Can you please look.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

The next test K6 is asking for a new pointer using doc type = 2 with the expectation an NA will be produced (with subsequent mark unique, etc). Would it be possible to add an ID pointer instead to exercise the possible duplicate scenario?

 NCB Block

But, as per the following section in the SPEXS Master Specification, if errors are encountered on the H1 through H7 messages,  
the Inquirer can return the parent message with the error block(s) explaining the error on the H1 through H7 messages  
or return the H1 through H7 messages with the error block(s) explaining the error

### CDM1.3.1 Transmission

**CDM1.3 TRANSMISSION**

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,  
or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,  
or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,  
or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),  
or

manually notify the SOR/Old SOR of the error.

Can you please look.

Thanks,  
Asma

## NCB Block

**CDM1.3 TRANSMISSION**

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,  
or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,  
or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,  
or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),  
or

manually notify the SOR/Old SOR of the error.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

This email comes from an external source, so remember, Think Before You Click!  
Gary,

As per Test Case # K6, AI initiates an Add Driver request that must contain information to create a duplicate pointer (CDLIS Indicator as 'Y' ) with the driver from Test Case # K5.

You have added a non-CDL pointer that has resulted in 'Type 7' duplicate.

The main intent of this Test Case is to make sure AI can send a Mark Unique Transaction to resolve the Duplicate when both the drivers belong to AI.

Can you please look.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

The next test K6 is asking for a new pointer using doc type = 2 with the expectation an NA will be produced (with subsequent mark unique, etc). Would it be possible to add an ID pointer instead to exercise the possible duplicate scenario?

---

**From:** Syeda, Asma [<mailto:ASyeda@aamva.org>]

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Gary,

I need 10 mints, to see the H7 issue.

Will let you know when to retry the UD message.

Thanks,  
Asma

---

**To:** Syeda, Asma <[ASyeda@aamva.org](mailto:ASyeda@aamva.org)>  
**Cc:** Singaraju, Sruti <[ssingaraju@aamva.org](mailto:ssingaraju@aamva.org)>; Mina Peters, AK Dept. of Administration <[mina.peters@alaska.gov](mailto:mina.peters@alaska.gov)>  
**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

The pointer has been deleted.

The H7 validation returned errors NO MATCHING CONVICTION ID CODE IN H3 MESSAGE and REPEATED CONVICTION IDS IN CONVICTIONS LINKS GRP although I would have to examine H7/H3/H5 to see exactly what was amiss.

This email comes from an external source, so remember, Think Before You Click!  
Gary,

I see that H1, H2 and H3 were with "INVALID SYSTEM RELEASE CODE " error. This has been fixed. Can we do the CSOR again? Please delete the pointer and I will re-add .

Also, what errors did you encountered with H7 linkages?

Please let me know.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

The CSOR completed although there were errors encountered with the H7 linkages. A UD message was sent back with the errors, which I gather is incorrect. Let me know your expectations on how this should have been handled.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Apparently I introduced a bug whereby no change in SSN on the UD caused a substitute SSN to be sent instead. Hence, the UD was returned in error. This will require a fix.

Would you like to jump back to Driver I? I deployed a fix for the NI so I should be able to retry test I3.

**CDM1.3 TRANSMISSION**

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,  
or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,  
or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,  
or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),  
or

manually notify the SOR/Old SOR of the error.

Yes Please.

And you can you use a different DLN , if not the UA will be in error "DUPLICATE ST/DLN ON FILE"

Thanks,  
Asma

This email comes from an external source, so remember, Think Before You Click!  
Gary,

As per Test Case # K6, AI initiates an Add Driver request that must contain information to create a duplicate pointer (CDLIS Indicator as 'Y' ) with the driver from Test Case # K5.

You have added a non-CDL pointer that has resulted in 'Type 7' duplicate.

The main intent of this Test Case is to make sure AI can send a Mark Unique Transaction to resolve the Duplicate when both the drivers belong to AI.

Can you please look.

Thanks,  
Asma

But, as per the following section in the SPEXS Master Specification, if errors are encountered on the H1 through H7 messages,  
the Inquirer can return the parent message with the error block(s) explaining the error on the H1 through H7 messages  
or return the H1 through H7 messages with the error block(s) explaining the error

### CDM1.3.1 Transmission

**CDM1.3 TRANSMISSION**

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,  
or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,  
or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,  
or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),  
or

manually notify the SOR/Old SOR of the error.

Can you please look.

Thanks,  
Asma

## NCB Block

**CDM1.3 TRANSMISSION**

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,  
or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,  
or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,  
or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),  
or

manually notify the SOR/Old SOR of the error.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver G

Hi all,

Late to the game on this one, but I wanted to clarify that this scenario would never happen, which might account for why Gary was confused. AK would never perform a CSOR taking a CDLIS record and turning it into a non-CDLIS record. Even if we are issuing a non-commercial credential, we always keep the CDLIS pointer.

This would likely cause a problem with FMCSA as well, so I strongly suggest this scenario be revised.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver G

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPES2). But since the new pointer is non-CDLIS, only the last 5 digits (BPES5) should be populated with a blank SSN (DDVSS6), correct?

**To:** Syeda, Asma <[ASyeda@aamva.org](mailto:ASyeda@aamva.org)>  
**Cc:** Mina Peters, AK Dept. of Administration <[mina.peters@alaska.gov](mailto:mina.peters@alaska.gov)>; Singaraju, Sruti <[ssingaraju@aamva.org](mailto:ssingaraju@aamva.org)>  
**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver G

Hi all,

Late to the game on this one, but I wanted to clarify that this scenario would never happen, which might account for why Gary was confused. AK would never perform a CSOR taking a CDLIS record and turning it into a non-CDLIS record. Even if we are issuing a non-commercial credential, we always keep the CDLIS pointer.

This would likely cause a problem with FMCSA as well, so I strongly suggest this scenario be revised.

Hi Gary,

FYI, we can add pointers with the pseudo SSN (which is the "all 9's" SSN). We just can't add pointers with a substitute SSN, because we don't use those. It's a subtle difference. ☐

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver G

Hi Mina,

Changing to a non-CDLIS pointer during a CSOR can never happen, since the UD message will be caught in the below validation :

SPEXS Master Specification (AMIE), r6.0.9

AAMVA - Off

ID	Clear Name and Identifier	Implementation Name	Validation	NSOR Implementation Release				Err
				CDLIS			CDLIS +S2S	
				4.1	5.1	5.3	6.0	
CD08. XCK.UD. 3700	Old CDLIS Pointer Indicator (DCDCP1)  CDLIS Pointer Indicator (DCDCPI)	CLMF-CDLIS-OLD-PTR-IND Format=Alpha-numeric Size=1  CLMF-CDLIS-PTR-IND Format=Alpha-numeric Size=1	Cannot be changed to Non-CDLIS pointer as part of CSOR.  If Old CDLIS Pointer Indicator (DCDCP1) is Y, then CDLIS Pointer Indicator (DCDCPI) cannot be 'N'.				x	CHANGING CDLIS POIN ALLOWED

In Driver G, Test Case # G3, AL sends a Update Data Request (UC) not a CSOR (UD) to change the pointer from a CDLIS to a non-CDLIS record.

Hope I answered your question.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

This email comes from an external source, so remember, Think Before You Click!  
Gary,

As per Test Case # K6, AI initiates an Add Driver request that must contain information to create a duplicate pointer (CDLIS Indicator as 'Y' ) with the driver from Test Case # K5.

You have added a non-CDL pointer that has resulted in 'Type 7' duplicate.

The main intent of this Test Case is to make sure AI can send a Mark Unique Transaction to resolve the Duplicate when both the drivers belong to AI.

Can you please look.

Thanks,  
Asma

But, as per the following section in the SPEXS Master Specification, if errors are encountered on the H1 through H7 messages,  
the Inquirer can return the parent message with the error block(s) explaining the error on the H1 through H7 messages  
or return the H1 through H7 messages with the error block(s) explaining the error

### CDM1.3.1 Transmission

SPEXS Master Specification (AMIE), r6.0.9

AAMVA - Official Use Only

#### CDM1.3 TRANSMISSION

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,  
or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,  
or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,  
or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),  
or

manually notify the SOR/Old SOR of the error.

Can you please look.

Thanks,  
Asma

**CDM1.3 TRANSMISSION**

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,  
or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,  
or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,  
or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),  
or

manually notify the SOR/Old SOR of the error.

Gary,

As per Test Case # K6, AI initiates an Add Driver request that must contain information to create a duplicate pointer (CDLIS Indicator as 'Y' ) with the driver from Test Case # K5.

You have added a non-CDL pointer that has resulted in 'Type 7' duplicate.

The main intent of this Test Case is to make sure AI can send a Mark Unique Transaction to resolve the Duplicate when both the drivers belong to AI.

Can you please look.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

This email comes from an external source, so remember, Think Before You Click!

Gary,

When the CSOR was first initiated, AI sent the UD back in error to P3 (OSOR) with the error :

251019999 99NO MATCHING CONVICTION ID CODE IN H3 MESSAGE

251029999 99REPEATED CONVICTION IDS IN CONVICTIONS LINKS GRP

But, as per the following section in the SPEXS Master Specification, if errors are encountered on the H1 through H7 messages,

the Inquirer can return the parent message with the error block(s) explaining the error on the H1 through H7 messages or return the H1 through H7 messages with the error block(s) explaining the error

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

The CSOR completed although there were errors encountered with the H7 linkages. A UD message was sent back with the errors, which I gather is incorrect. Let me know your expectations on how this should have been handled.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Apparently I introduced a bug whereby no change in SSN on the UD caused a substitute SSN to be sent instead. Hence, the UD was returned in error. This will require a fix.

Would you like to jump back to Driver I? I deployed a fix for the NI so I should be able to retry test I3.

**CDM1.3 TRANSMISSION**

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,  
or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,  
or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,  
or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),  
or

manually notify the SOR/Old SOR of the error.

Ok. Would you like me to delete the pointer and re-add it with CDLIS indicator 'Y'?

This email comes from an external source, so remember, Think Before You Click!  
Gary,

As per Test Case # K6, AI initiates an Add Driver request that must contain information to create a duplicate pointer (CDLIS Indicator as 'Y' ) with the driver from Test Case # K5.

You have added a non-CDL pointer that has resulted in 'Type 7' duplicate.

The main intent of this Test Case is to make sure AI can send a Mark Unique Transaction to resolve the Duplicate when both the drivers belong to AI.

Can you please look.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

The next test K6 is asking for a new pointer using doc type = 2 with the expectation an NA will be produced (with subsequent mark unique, etc). Would it be possible to add an ID pointer instead to exercise the possible duplicate scenario?

**NCB Block**

But, as per the following section in the SPEXS Master Specification, if errors are encountered on the H1 through H7 messages, the Inquirer can return the parent message with the error block(s) explaining the error on the H1 through H7 messages or return the H1 through H7 messages with the error block(s) explaining the error

### CDM1.3.1 Transmission

SPEXS Master Specification (AMIE), r6.0.9

AAMVA - Official Use Only

#### CDM1.3 TRANSMISSION

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error, or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error, or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message, or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s), or

manually notify the SOR/Old SOR of the error.

Can you please look.

Thanks,  
Asma

**CDM1.3 TRANSMISSION**

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,  
or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,  
or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,  
or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),  
or

manually notify the SOR/Old SOR of the error.

**Subject:** ~~AL~~ AK SSOLV testing

Hi Gary,

This is Fatima from AAMVA verification systems QA team. We came to know that ~~AL~~ AK is going through system rewrite. The alternate gap code ~~AL~~ AK will be using is AI. Please confirm.

Please be informed that there is a SSOLV test environment. I am in a process of authorizing ~~AL~~ AK to NCS and UNI for accessing SSOLV from the new gap code AI.

We will reach out to SSA and have them authorize AI in their test env so that ~~AL~~ AK can send SSOLV message all the way to SSA even with the alternate gap code. If anything changes, I will keep you posted.

Once the setup is all completed, my colleague Nadeem will assist you in testing as per your convenient. He will share with you the test plan as well.

Please let us know of any question.

Thanks,

**Cc:** Singaraju, Sruti; Peters, Mina L (DOA)  
**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Well, apparently we've imposed a restriction that prevents a UG from designating a local jurisdiction pointer as the duplicate. So this will require a fix.

This may be a good point to inventory the current bug list and bring Mina into the mix on a few topics.

- 1) Update UC ensuring the full SSN is blank for both old and new non-CDLIS SSNs.
- 2) Allow C permit class to have N restriction
- 3) Return CSOR linkage errors using H7 message
- 4) Mark Unique duplicate pointer from local juri
- 5) CSOR in-progress allow SOI inquiries

Mina, a change was made to the Aamva menu SPEXS Add Pointer page allowing a NO DOCUMENT pointer (doc type = 8) whereby the driver has no credentials. If NO DOCUMENT is selected, the Real ID Conformant can be any value (normally we restrict to "2"). Driver J scenario requires pointer with doc type = 8 and real id = 8. The subsequent problem is the ability to delete this type of pointer since we do not persist real id conformant; hence the delete pointer page will likely need to be more flexible. Comments?

Also, I find that AK driver accidents do not store a locator reference. It is not clear to me if/how we should be providing a value for the H4 parameter.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

This email comes from an external source, so remember, Think Before You Click!  
Gary,

As per Test Case # K6, AI initiates an Add Driver request that must contain information to create a duplicate pointer (CDLIS Indicator as 'Y' ) with the driver from Test Case # K5.

You have added a non-CDL pointer that has resulted in 'Type 7' duplicate.

The main intent of this Test Case is to make sure AI can send a Mark Unique Transaction to resolve the Duplicate when both the drivers belong to AI.

Can you please look.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

The next test K6 is asking for a new pointer using doc type = 2 with the expectation an NA will be produced (with subsequent mark unique, etc). Would it be possible to add an ID pointer instead to exercise the possible duplicate scenario?

Gary,

We can continue with Driver K and come back to this Test Case once the issue is fixed and re-test.

Let me know if this is ok with you.

Thanks,  
Asma

But, as per the following section in the SPEXS Master Specification, if errors are encounters on the H1 through H7 messages,  
 the Inquirer can return the parent message with the error block(s) explaining the error on the H1 through H7 messages  
 or return the H1 through H7 messages with the error block(s) explaining the error

### CDM1.3.1 Transmission

**CDM1.3 TRANSMISSION**

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,  
or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,  
or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,  
or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),  
or

manually notify the SOR/Old SOR of the error.

Can you please look.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Apparently I introduced a bug whereby no change in SSN on the UD caused a substitute SSN to be sent instead. Hence, the UD was returned in error. This will require a fix.

Would you like to jump back to Driver I? I deployed a fix for the NI so I should be able to retry test I3.

## NCB Block

**CDM1.3 TRANSMISSION**

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,  
or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,  
or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,  
or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),  
or

manually notify the SOR/Old SOR of the error.

---

**Cc:** Singaraju, Sruti; Peters, Mina L (DOA)  
**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Well, apparently we've imposed a restriction that prevents a UG from designating a local jurisdiction pointer as the duplicate. So this will require a fix.

This may be a good point to inventory the current bug list and bring Mina into the mix on a few topics.

- 1) Update UC ensuring the full SSN is blank for both old and new non-CDLIS SSNs.
- 2) Allow C permit class to have N restriction
- 3) Return CSOR linkage errors using H7 message
- 4) Mark Unique duplicate pointer from local juri
- 5) CSOR in-progress allow SOI inquiries

Mina, a change was made to the Aamva menu SPEXS Add Pointer page allowing a NO DOCUMENT pointer (doc type = 8) whereby the driver has no credentials. If NO DOCUMENT is selected, the Real ID Conformant can be any value (normally we restrict to "2"). Driver J scenario requires pointer with doc type = 8 and real id = 8. The subsequent problem is the ability to delete this type of pointer since we do not persist real id conformant; hence the delete pointer page will likely need to be more flexible. Comments?

Also, I find that AK driver accidents do not store a locator reference. It is not clear to me if/how we should be providing a value for the H4 parameter.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

This email comes from an external source, so remember, Think Before You Click!  
Gary,

As per Test Case # K6, AI initiates an Add Driver request that must contain information to create a duplicate pointer (CDLIS Indicator as 'Y' ) with the driver from Test Case # K5.

You have added a non-CDL pointer that has resulted in 'Type 7' duplicate.

The main intent of this Test Case is to make sure AI can send a Mark Unique Transaction to resolve the Duplicate when both the drivers belong to AI.

Can you please look.

Thanks,  
Asma

But, as per the following section in the SPEXS Master Specification, if errors are encounters on the H1 through H7 messages,  
 the Inquirer can return the parent message with the error block(s) explaining the error on the H1 through H7 messages  
 or return the H1 through H7 messages with the error block(s) explaining the error

### CDM1.3.1 Transmission

**CDM1.3 TRANSMISSION**

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,  
or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,  
or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,  
or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),  
or

manually notify the SOR/Old SOR of the error.

Can you please look.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Apparently I introduced a bug whereby no change in SSN on the UD caused a substitute SSN to be sent instead. Hence, the UD was returned in error. This will require a fix.

Would you like to jump back to Driver I? I deployed a fix for the NI so I should be able to retry test I3.

**CDM1.3 TRANSMISSION**

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,  
or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,  
or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,  
or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),  
or

manually notify the SOR/Old SOR of the error.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

This email comes from an external source, so remember, Think Before You Click!  
Gary,

As per Test Case # K6, AI initiates an Add Driver request that must contain information to create a duplicate pointer (CDLIS Indicator as 'Y' ) with the driver from Test Case # K5.

You have added a non-CDL pointer that has resulted in 'Type 7' duplicate.

The main intent of this Test Case is to make sure AI can send a Mark Unique Transaction to resolve the Duplicate when both the drivers belong to AI.

Can you please look.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

The next test K6 is asking for a new pointer using doc type = 2 with the expectation an NA will be produced (with subsequent mark unique, etc). Would it be possible to add an ID pointer instead to exercise the possible duplicate scenario?

But, as per the following section in the SPEXS Master Specification, if errors are encountered on the H1 through H7 messages, the Inquirer can return the parent message with the error block(s) explaining the error on the H1 through H7 messages or return the H1 through H7 messages with the error block(s) explaining the error

### CDM1.3.1 Transmission

SPEXS Master Specification (AMIE), r6.0.9

AAMVA - Official Use Only

#### CDM1.3 TRANSMISSION

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error, or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error, or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message, or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s), or

manually notify the SOR/Old SOR of the error.

Can you please look.

Thanks,  
Asma

**CDM1.3 TRANSMISSION**

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,  
or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,  
or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,  
or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),  
or

manually notify the SOR/Old SOR of the error.

**To:** Tancik, Gary (DOA sponsored)  
**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver E

Hi Gary,

We have been populating the accident locator with a placeholder "SER567" when it is blank (logic is in ACDD710N), in anticipation of having a crash data repository (CDR). The CDR should have been instituted back in 2008...however, it is still a "work in progress".

So, for now, please just use the placeholder.

Regards,

Mina Peters  
Analyst Programmer V  
State of Alaska  
Division of Motor Vehicles

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver E

Looking through historic AK accident data, it seems the locator reference is not populated if the accident occurred in the AK jurisdiction.

Can you verify this is a required parameter? If so this will require a fix to at least substitute in the record ID.

This email comes from an external source, so remember, Think Before You Click!  
Gary,

HB, H3, H5, H7 looks fine.

On the H4 message, Accident Locator Reference is missing:

ACCIDENT DATE	1	20170710
ACCIDENT JURISDICTION CODE	1	AK
ACCIDENT LOCATOR REFERENCE	1	
ACCIDENT SEVERITY CODE	1	5
DRIVER ACCIDENT COMMERCIAL VEH IND	1	1
DRIVER ACCIDENT HAZMAT IND	1	2

## SPEXS Master Specs:

### CDL1.3.5 Transmission of Driver History Accidents (H4) Message:

If sent, the Driver History Accidents (H4) Message must include 1 to 50 accidents. For each accident sent, the following data elements must be sent:

ID	Clear Name and Identifier	Implementation Name	Population Rules	Cardinality (min - max) SOR Implementation		
				CDUS		
				4.1	5.1	5.3
CDL1.TRN.H4.1000	Accident Jurisdiction Code (DACJUR)	Format=Alpha-numeric Size=2 CLMF-CODE-ACC-JUR	Set to the appropriate jurisdiction code in which the accident occurred	1-50	1-50	1-50
CDL1.TRN.H4.1100	Accident Date (DACDAT)	Format=ccyyymmdd Size=8 CLMF-DATE-ACC	Set to the appropriate date.	1-50	1-50	1-50
CDL1.TRN.H4.1200	Accident Severity Code (DACSEV)	Format=Alpha-numeric Size=1 CLMF-INDC-ACC-SEVERITY	Set to the appropriate code.	1-50	1-50	1-50
CDL1.TRN.H4.1300	Driver Accident Commercial Vehicle Indicator (DDACOM)	CLMF-INDC-ACC-COMM Format=Alpha-numeric Size=1	Set to the appropriate code.	1-50	1-50	1-50
CDL1.TRN.H4.1400	Driver Accident HAZMAT Indicator (DDAHAZ)	CLMF-INDC-ACC-HAZ-MAT Format=Alpha-numeric Size=1	Set to the appropriate code.	1-50	1-50	1-50

CDL1 Process History Request (SOR/Old SOR)

SPEXS Master Specification (AMIE), r6.0.9

AAMVA - Official

ID	Clear Name and Identifier	Implementation Name	Population Rules	Cardinality (min - max) SOR Implementation		
				CDUS		
				4.1	5.1	5.3
CDL1.TRN.H4.1500	Accident Locator Reference (DACLOC)	Format=Alpha-numeric Size=18 CLMF-INDC-ACC-LOC	Set to the appropriate reference number.	1-50	1-50	1-50

Can you please look.

This email comes from an external source, so remember, Think Before You Click!  
Gary,

# E13 sent, responses received:

- On the HB message, DL Issue Date (DDLIS) is missing .
- On the H3 Message there are 3 convictions – S14, S92 and S16.  
S14 has a withdrawal on the H5 Message, this is fine. Since there are 2 Serious convictions (S92 and S16) within 3 years on the H3 message, they should be linked to withdrawal ACD Code 'W30' on the H5 message.

**ACD Manual:**

AAMVA Code Dictionary (ACD) - Release 5.0.0

**Table 18. Withdrawal Disqualification Periods**

Withdrawal Disqualification Periods			
<i>NOTE: disqualification period must be in addition to any other previous period of disqualification (run consecutively)[49 CFR §383.51(a)(5)]</i>			
FMCSR	FMCSR Disqualification Period	ACD	ACD Code Description
383.51(b)(9)	Lifetime	A50	First violation of using a motor vehicle in the commission of a felony involving manufacturing, distributing, or dispensing a controlled substance. (ineligible for reinstatement)
383.73(k)(2)	Indefinite; driver must reapply for a CLP or CDL under State procedures applicable to all CLP and CDL applicants	W27	Failure to make an appointment within 30 days of receiving notification that re-testing is necessary [when fraud is suspected]
383.73(k)(2)	Indefinite; driver must reapply for a CLP or CDL under State procedures applicable to all CLP and CDL applicants	W28	Failure to retest or failure of scheduled test(s) [when fraud is suspected]
383.51(c)	60 days for second serious offense w/in 3 yr	W30	Two serious violations within three years

Can you please look.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver E

Can you help clarify the nature of the problem?

The previously sent HT with conviction ACD S92 had a conviction offense detail of 55080 and conviction ACD S16 had a detail of 05. However, the H3 returned blank detail for S92 but did include detail 05 for S16. So in this case the error was generated because S92 detail was blank and not 55080?

Are you expecting the full 55080 detail or just the speed portion, 55?

This email comes from an external source, so remember, Think Before You Click!

Hi Gary,

We have been populating the accident locator with a placeholder "SER567" when it is blank (logic is in ACDD710N), in anticipation of having a crash data repository (CDR). The CDR should have been instituted back in 2008...however, it is still a "work in progress".

So, for now, please just use the placeholder.

Regards,

Mina Peters  
Analyst Programmer V  
State of Alaska  
Division of Motor Vehicles

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver E

Looking through historic AK accident data, it seems the locator reference is not populated if the accident occurred in the AK jurisdiction.

Can you verify this is a required parameter? If so this will require a fix to at least substitute in the record ID.

Gary,

HB, H3, H5, H7 looks fine.

On the H4 message, Accident Locator Reference is missing:

ACCIDENT DATE	1	20170710
ACCIDENT JURISDICTION CODE	1	AK
ACCIDENT LOCATOR REFERENCE	1	
ACCIDENT SEVERITY CODE	1	5
DRIVER ACCIDENT COMMERCIAL VEH INI	1	1
DRIVER ACCIDENT HAZMAT IND	1	2

**SPEXS Master Specs:**

CDL1.3.5 Transmission of Driver History Accidents (H4) Message:

If sent, the Driver History Accidents (H4) Message must include 1 to 50 accidents. For each accident sent, the following data elements must be sent:

ID	Clear Name and Identifier	Implementation Name	Population Rules	Cardinality (min - max) SOR Implementation		
				CDLIS		
				4.1	5.1	5.3
CDL1.TRN.H4.1000	Accident Jurisdiction Code (DACJUR)	Format=Alpha-numeric Size=2 CLMF-CODE-ACC-JUR	Set to the appropriate jurisdiction code in which the accident occurred	1-50	1-50	1-50
CDL1.TRN.H4.1100	Accident Date (DACDAT)	Format=ccyyymmdd Size=8 CLMF-DATE-ACC	Set to the appropriate date.	1-50	1-50	1-50
CDL1.TRN.H4.1200	Accident Severity Code (DACSEV)	Format=Alpha-numeric Size=1 CLMF-INDC-ACC-SEVERITY	Set to the appropriate code.	1-50	1-50	1-50
CDL1.TRN.H4.1300	Driver Accident Commercial Vehicle Indicator (DDACOM)	CLMF-INDC-ACC-COMM Format=Alpha-numeric Size=1	Set to the appropriate code.	1-50	1-50	1-50

This email comes from an external source, so remember, Think Before You Click!

Gary,

# E13 sent, responses received:

- On the HB message, DL Issue Date (DDLISS) is missing .
- On the H3 Message there are 3 convictions – S14, S92 and S16.  
S14 has a withdrawal on the H5 Message, this is fine. Since there are 2 Serious convictions (S92 and S16) within 3 years on the H3 message, they should be linked to withdrawal ACD Code 'W30' on the H5 message.

#### ACD Manual:

AAMVA Code Dictionary (ACD) - Release 5.0.0

**Table 18. Withdrawal Disqualification Periods**

<b>Withdrawal Disqualification Periods</b>			
<i>NOTE: disqualification period must be in addition to any other previous period of disqualification (run consecutively)[49 CFR §383.51(a)(5)]</i>			
FMCSR	FMCSR Disqualification Period	ACD	ACD Code Description
383.51(b)(9)	Lifetime	A50	First violation of using a motor vehicle in the commission of a felony involving manufacturing, distributing, or dispensing a controlled substance. (ineligible for reinstatement)
383.73(k)(2)	Indefinite; driver must reapply for a CLP or CDL under State procedures applicable to all CLP and CDL applicants	W27	Failure to make an appointment within 30 days of receiving notification that re-testing is necessary [when fraud is suspected]
383.73(k)(2)	Indefinite; driver must reapply for a CLP or CDL under State procedures applicable to all CLP and CDL applicants	W28	Failure to retest or failure of scheduled test(s) [when fraud is suspected]
383.51(c)	60 days for second serious offense w/in 3 yr	W30	Two serious violations within three years

Can you please look.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver E

Can you help clarify the nature of the problem?

The previously sent HT with conviction ACD S92 had a conviction offense detail of 55080 and conviction ACD S16 had a detail of 05. However, the H3 returned blank detail for S92 but did include detail 05 for S16. So in this case the error was generated because S92 detail was blank and not 55080?

Are you expecting the full 55080 detail or just the speed portion, 55?

Gary,

H3 was in error "INVALID CONV OFF DETAIL FOR ACD CONV CODE = S92", can you please look.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

This email comes from an external source, so remember, Think Before You Click!  
Gary,

As per Test Case # K6, AI initiates an Add Driver request that must contain information to create a duplicate pointer (CDLIS Indicator as 'Y' ) with the driver from Test Case # K5.

You have added a non-CDL pointer that has resulted in 'Type 7' duplicate.

The main intent of this Test Case is to make sure AI can send a Mark Unique Transaction to resolve the Duplicate when both the drivers belong to AI.

Can you please look.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

The next test K6 is asking for a new pointer using doc type = 2 with the expectation an NA will be produced (with subsequent mark unique, etc). Would it be possible to add an ID pointer instead to exercise the possible duplicate scenario?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

The intention was to return the H7 with the errors but there is a bug that will require a fix. Did you want to stop with Driver K scenario until this can be addressed?

NCB Block

But, as per the following section in the SPEXS Master Specification, if errors are encounters on the H1 through H7 messages, the Inquirer can return the parent message with the error block(s) explaining the error on the H1 through H7 messages or return the H1 through H7 messages with the error block(s) explaining the error

### CDM1.3.1 Transmission

**CDM1.3 TRANSMISSION**

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,  
or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,  
or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,  
or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),  
or

manually notify the SOR/Old SOR of the error.

Can you please look.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Apparently I introduced a bug whereby no change in SSN on the UD caused a substitute SSN to be sent instead. Hence, the UD was returned in error. This will require a fix.

Would you like to jump back to Driver I? I deployed a fix for the NI so I should be able to retry test I3.

## NCB Block

**CDM1.3 TRANSMISSION**

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,  
or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,  
or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,  
or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),  
or

manually notify the SOR/Old SOR of the error.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

This email comes from an external source, so remember, Think Before You Click!  
Gary,

As per Test Case # K6, AI initiates an Add Driver request that must contain information to create a duplicate pointer (CDLIS Indicator as 'Y' ) with the driver from Test Case # K5.

You have added a non-CDL pointer that has resulted in 'Type 7' duplicate.

The main intent of this Test Case is to make sure AI can send a Mark Unique Transaction to resolve the Duplicate when both the drivers belong to AI.

Can you please look.

Thanks,  
Asma

NCB Block

But, as per the following section in the SPEXS Master Specification, if errors are encounters on the H1 through H7 messages,  
 the Inquirer can return the parent message with the error block(s) explaining the error on the H1 through H7 messages  
 or return the H1 through H7 messages with the error block(s) explaining the error

### CDM1.3.1 Transmission

**CDM1.3 TRANSMISSION**

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,  
or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,  
or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,  
or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),  
or

manually notify the SOR/Old SOR of the error.

Can you please look.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

I received the return error THE MSTR PTR REC RQSTD NOT ON FILE, although the pointer parameters appear to match the values depicted in test K5 for the P3 driver. Can you help find the problem?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Apparently I introduced a bug whereby no change in SSN on the UD caused a substitute SSN to be sent instead. Hence, the UD was returned in error. This will require a fix.

Would you like to jump back to Driver I? I deployed a fix for the NI so I should be able to retry test I3.

**CDM1.3 TRANSMISSION**

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,  
or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,  
or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,  
or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),  
or

manually notify the SOR/Old SOR of the error.

Ok. Would you like me to delete the pointer and re-add it with CDLIS indicator 'Y'?

This email comes from an external source, so remember, Think Before You Click!  
Gary,

As per Test Case # K6, AI initiates an Add Driver request that must contain information to create a duplicate pointer (CDLIS Indicator as 'Y' ) with the driver from Test Case # K5.

You have added a non-CDL pointer that has resulted in 'Type 7' duplicate.

The main intent of this Test Case is to make sure AI can send a Mark Unique Transaction to resolve the Duplicate when both the drivers belong to AI.

Can you please look.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

The next test K6 is asking for a new pointer using doc type = 2 with the expectation an NA will be produced (with subsequent mark unique, etc). Would it be possible to add an ID pointer instead to exercise the possible duplicate scenario?

But, as per the following section in the SPEXS Master Specification, if errors are encountered on the H1 through H7 messages, the Inquirer can return the parent message with the error block(s) explaining the error on the H1 through H7 messages or return the H1 through H7 messages with the error block(s) explaining the error

## CDM1.3.1 Transmission

SPEXS Master Specification (AMIE), r6.0.9

AAMVA - Official Use Only

### CDM1.3 TRANSMISSION

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,  
or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,  
or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,  
or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),  
or

manually notify the SOR/Old SOR of the error.

Can you please look.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

This email comes from an external source, so remember, Think Before You Click!

Gary,

The IN message was sent with Driver Lic Number as 'P3DRIVERK66', Driver K's Lic number is 'DRIVERK66':

IN Message from AI:

022011707250815350000 1UNIIN 02020  
09101P3P3DRIVERK66 36666A  
10101 19661231  
10J01AIS2SEXCHGDRIVERK ALASKA DRIVERK  
10J02 DRIVERALASKA DRIVERK SR  
10N01NNNUUU

Can you please re-send # K1?

Thanks,  
Asma

## NCB Block

**CDM1.3 TRANSMISSION**

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,  
or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,  
or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,  
or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),  
or

manually notify the SOR/Old SOR of the error.

**Subject:** ~~AL~~ AK SSOLV testing

Hi Gary,

This is Fatima from AAMVA verification systems QA team. We came to know that ~~AL~~ **AK** is going through system rewrite. The alternate gap code ~~AL~~ **AK** will be using is ~~AI~~ **AK**. Please confirm.

Please be informed that there is a SSOLV test environment. I am in a process of authorizing ~~AL~~ **AK** to NCS and UNI for accessing SSOLV form the new gap code AI.

We will reach out to SSA and have them authorize AI in their test env so that ~~AL~~ **AK** can send SSOLV message all the way to SSA even with the alternate gap code. If anything changes, I will keep you posted.

Once the setup is all completed, my colleague Nadeem will assist you in testing as per your convenient. He will share with you the test plan as well.

Please let us know of any question.

Thanks,

**Subject:** NR03 MEC Search Inquiry System Specification (AMIE) now available.

Dear CDLIS Participants,

The Mini Specification for the third National Registry of Certified Medical Examiners II transaction 'NR03 MEC Search Inquiry' is now available on the AAMVA website.

These Mini Specification and notes regarding the usage of the Mini Specification documents are available under the 'Documentation' tab of the National Registry of Certified Medical Examiners II page: <http://www.aamva.org/NationalRegistryofCertifiedMedicalExaminersII/>

AAMVA hosted webinars that provided a high level overview of the National Registry of Certified Medical Examiners II solution, and a walk through of the NR03 Mini Spec in May 2017. The recording for these webinars and associated slides can be found in the AAMVA Webinar Archives: <http://www.aamva.org/Webinar-Archives/>

AAMVA will also be releasing Mini Specifications for SDLA NIEM (Web Services) and will inform you once they are available. The complete Master Specification (both the AMIE and NIEM version) will be published by February 2018.

AAMVA's Unified Network Interface (UNI) software has been updated to include changes for the National Registry of Certified Medical Examiners II application (AppID 40).

To receive the UNI updates, or if you have any questions, please contact [Helpdesk@aamva.org](mailto:Helpdesk@aamva.org)

Thank you!

**Subject:** NR03 MEC Search Inquiry System Specification (AMIE) now available.

Dear CDLIS Participants,

The Mini Specification for the third National Registry of Certified Medical Examiners II transaction 'NR03 MEC Search Inquiry' is now available on the AAMVA website.

These Mini Specification and notes regarding the usage of the Mini Specification documents are available under the 'Documentation' tab of the National Registry of Certified Medical Examiners II page: <http://www.aamva.org/NationalRegistryofCertifiedMedicalExaminersII/>

AAMVA hosted webinars that provided a high level overview of the National Registry of Certified Medical Examiners II solution, and a walk through of the NR03 Mini Spec in May 2017. The recording for these webinars and associated slides can be found in the AAMVA Webinar Archives: <http://www.aamva.org/Webinar-Archives/>

AAMVA will also be releasing Mini Specifications for SDLA NIEM (Web Services) and will inform you once they are available. The complete Master Specification (both the AMIE and NIEM version) will be published by February 2018.

AAMVA's Unified Network Interface (UNI) software has been updated to include changes for the National Registry of Certified Medical Examiners II application (AppID 40).

To receive the UNI updates, or if you have any questions, please contact [Helpdesk@aamva.org](mailto:Helpdesk@aamva.org)

Thank you!

---

Good afternoon, AAMVA,

This is continuing to be a problem. Please advise.

FYI, it is being returned with NCB ERROR = Y. I resubmitted one that successfully returned an RT this morning, but it also returned with the NCB error. This issue began at 4:06pm Eastern – we have not received a successful RT since that time.

**Importance:** High

Good afternoon, AAMVA,

This is continuing to be a problem. Please advise.

FYI, it is being returned with NCB ERROR = Y. I resubmitted one that successfully returned an RT this morning, but it also returned with the NCB error. This issue began at 4:06pm Eastern – we have not received a successful RT since that time.

Hi Daniel,

I have finally identified the problem. It appears that when we send an IT message to NN, it is being returned from NN – no error message attached. One example of many is message control key 1707271324050001.  
Please advise.

### Notification of Ticket Registration

Thank you for opening a ticket with the AAMVA Operations Help Desk. Meeting your needs is important to us.

An AAMVA Operations representative has been assigned to review your request. AAMVA's Help Desk office hours are 7am ET - 10pm ET Monday through Friday and 8am ET - 4:30pm ET on Saturday. If this request was received within this timeframe, the representative will be contacting you shortly in regards to completing your request.

If this request was made after hours, it will be actively worked during the morning of the next business day. If you have any questions, or if this is an after-hours emergency, please contact the AAMVA Operations Department by replying to this email, or by calling 1-888-226-8280 option 1.

**Ticket:** RE: NMVTIS

**Ticket Number:** 172479

**Status:** Request **Date:** 07/27/2017

We are not experiencing any outages at this time. We are seeing transactions taking place from AK to NMVTIS and back. Could you please re-investigate and advise?

Good afternoon, AAMVA,

We are having issues receiving our NMVTIS messages. Is there an outage?

Regards,

Mina Peters  
Analyst Programmer V  
State of Alaska  
Division of Motor Vehicles  
Mina.Peters@alaska.gov

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

This email comes from an external source, so remember, Think Before You Click!

Gary,

As per Test Case # K6, AI initiates an Add Driver request that must contain information to create a duplicate pointer (CDLIS Indicator as 'Y' ) with the driver from Test Case # K5.

You have added a non-CDL pointer that has resulted in 'Type 7' duplicate.

The main intent of this Test Case is to make sure AI can send a Mark Unique Transaction to resolve the Duplicate when both the drivers belong to AI.

Can you please look.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

The next test K6 is asking for a new pointer using doc type = 2 with the expectation an NA will be produced (with subsequent mark unique, etc). Would it be possible to add an ID pointer instead to exercise the possible duplicate scenario?

**NCB Block**

But, as per the following section in the SPEXS Master Specification, if errors are encountered on the H1 through H7 messages, the Inquirer can return the parent message with the error block(s) explaining the error on the H1 through H7 messages or return the H1 through H7 messages with the error block(s) explaining the error

### CDM1.3.1 Transmission

SPEXS Master Specification (AMIE), r6.0.9

AAMVA - Official Use Only

#### CDM1.3 TRANSMISSION

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error, or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error, or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message, or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s), or

manually notify the SOR/Old SOR of the error.

Can you please look.

Thanks,  
Asma

## NCB Block

**CDM1.3 TRANSMISSION**

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,  
or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,  
or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,  
or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),  
or

manually notify the SOR/Old SOR of the error.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

This email comes from an external source, so remember, Think Before You Click!

Gary,

As per Test Case # K6, AI initiates an Add Driver request that must contain information to create a duplicate pointer (CDLIS Indicator as 'Y' ) with the driver from Test Case # K5.

You have added a non-CDL pointer that has resulted in 'Type 7' duplicate.

The main intent of this Test Case is to make sure AI can send a Mark Unique Transaction to resolve the Duplicate when both the drivers belong to AI.

Can you please look.

Thanks,  
Asma

---

NCB Block

But, as per the following section in the SPEXS Master Specification, if errors are encountered on the H1 through H7 messages, the Inquirer can return the parent message with the error block(s) explaining the error on the H1 through H7 messages or return the H1 through H7 messages with the error block(s) explaining the error

### CDM1.3.1 Transmission

SPEXS Master Specification (AMIE), r6.0.9

AAMVA - Official Use Only

#### CDM1.3 TRANSMISSION

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error, or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error, or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message, or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s), or

manually notify the SOR/Old SOR of the error.

Can you please look.

Thanks,  
Asma

Gary,

I need 10 mints, to see the H7 issue.

Will let you know when to retry the UD message.

Thanks,  
Asma

**To:** Syeda, Asma <[ASyeda@aamva.org](mailto:ASyeda@aamva.org)>  
**Cc:** Singaraju, Sruti <[ssingaraju@aamva.org](mailto:ssingaraju@aamva.org)>; Mina Peters, AK Dept. of Administration <[mina.peters@alaska.gov](mailto:mina.peters@alaska.gov)>  
**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

The pointer has been deleted.

The H7 validation returned errors NO MATCHING CONVICTION ID CODE IN H3 MESSAGE and REPEATED CONVICTION IDS IN CONVICTIONS LINKS GRP although I would have to examine H7/H3/H5 to see exactly what was amiss.

This email comes from an external source, so remember, Think Before You Click!  
Gary,

I see that H1, H2 and H3 were with "INVALID SYSTEM RELEASE CODE " error. This has been fixed. Can we do the CSOR again? Please delete the pointer and I will re-add .

Also, what errors did you encountered with H7 linkages?

Please let me know.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

The CSOR completed although there were errors encountered with the H7 linkages. A UD message was sent back with the errors, which I gather is incorrect. Let me know your expectations on how this should have been handled.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Apparently I introduced a bug whereby no change in SSN on the UD caused a substitute SSN to be sent instead. Hence, the UD was returned in error. This will require a fix.

Would you like to jump back to Driver I? I deployed a fix for the NI so I should be able to retry test I3.

**CDM1.3 TRANSMISSION**

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,  
or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,  
or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,  
or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),  
or

manually notify the SOR/Old SOR of the error.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

This email comes from an external source, so remember, Think Before You Click!  
Gary,

As per Test Case # K6, AI initiates an Add Driver request that must contain information to create a duplicate pointer (CDLIS Indicator as 'Y' ) with the driver from Test Case # K5.

You have added a non-CDL pointer that has resulted in 'Type 7' duplicate.

The main intent of this Test Case is to make sure AI can send a Mark Unique Transaction to resolve the Duplicate when both the drivers belong to AI.

Can you please look.

Thanks,  
Asma

But, as per the following section in the SPEXS Master Specification, if errors are encountered on the H1 through H7 messages, the Inquirer can return the parent message with the error block(s) explaining the error on the H1 through H7 messages or return the H1 through H7 messages with the error block(s) explaining the error

### CDM1.3.1 Transmission

SPEXS Master Specification (AMIE), r6.0.9

AAMVA - Official Use Only

#### CDM1.3 TRANSMISSION

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error, or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error, or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message, or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s), or

manually notify the SOR/Old SOR of the error.

Can you please look.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

I inadvertently sent a UA instead of the UD. Which is resulting in receiving an NA. Is it appropriate for me to just delete the pointer or is there anything further necessary to resolve the possible duplicate?

### CDM1.3 TRANSMISSION

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,  
or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,  
or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,  
or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),  
or

manually notify the SOR/Old SOR of the error.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

This email comes from an external source, so remember, Think Before You Click!  
Gary,

As per Test Case # K6, AI initiates an Add Driver request that must contain information to create a duplicate pointer (CDLIS Indicator as 'Y' ) with the driver from Test Case # K5.

You have added a non-CDL pointer that has resulted in 'Type 7' duplicate.

The main intent of this Test Case is to make sure AI can send a Mark Unique Transaction to resolve the Duplicate when both the drivers belong to AI.

Can you please look.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

The next test K6 is asking for a new pointer using doc type = 2 with the expectation an NA will be produced (with subsequent mark unique, etc). Would it be possible to add an ID pointer instead to exercise the possible duplicate scenario?

NCB Block

But, as per the following section in the SPEXS Master Specification, if errors are encounters on the H1 through H7 messages,  
 the Inquirer can return the parent message with the error block(s) explaining the error on the H1 through H7 messages or return the H1 through H7 messages with the error block(s) explaining the error

### CDM1.3.1 Transmission

**CDM1.3 TRANSMISSION**

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,  
or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,  
or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,  
or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),  
or

manually notify the SOR/Old SOR of the error.

Can you please look.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Apparently I introduced a bug whereby no change in SSN on the UD caused a substitute SSN to be sent instead. Hence, the UD was returned in error. This will require a fix.

Would you like to jump back to Driver I? I deployed a fix for the NI so I should be able to retry test I3.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

This email comes from an external source, so remember, Think Before You Click!  
Gary,

As per Test Case # K6, AI initiates an Add Driver request that must contain information to create a duplicate pointer (CDLIS Indicator as 'Y' ) with the driver from Test Case # K5.

You have added a non-CDL pointer that has resulted in 'Type 7' duplicate.

The main intent of this Test Case is to make sure AI can send a Mark Unique Transaction to resolve the Duplicate when both the drivers belong to AI.

Can you please look.

Thanks,  
Asma

---

NCB Block

But, as per the following section in the SPEXS Master Specification, if errors are encounters on the H1 through H7 messages,  
 the Inquirer can return the parent message with the error block(s) explaining the error on the H1 through H7 messages  
 or return the H1 through H7 messages with the error block(s) explaining the error

### CDM1.3.1 Transmission

**CDM1.3 TRANSMISSION**

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,  
or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,  
or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,  
or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),  
or

manually notify the SOR/Old SOR of the error.

Can you please look.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Gary,

I need 10 mints, to see the H7 issue.

Will let you know when to retry the UD message.

Thanks,  
Asma

**To:** Syeda, Asma <[ASyeda@aamva.org](mailto:ASyeda@aamva.org)>  
**Cc:** Singaraju, Sruti <[ssingaraju@aamva.org](mailto:ssingaraju@aamva.org)>; Mina Peters, AK Dept. of Administration <[mina.peters@alaska.gov](mailto:mina.peters@alaska.gov)>  
**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

The pointer has been deleted.

The H7 validation returned errors NO MATCHING CONVICTION ID CODE IN H3 MESSAGE and REPEATED CONVICTION IDS IN CONVICTIONS LINKS GRP although I would have to examine H7/H3/H5 to see exactly what was amiss.

This email comes from an external source, so remember, Think Before You Click!

Gary,

I see that H1, H2 and H3 were with "INVALID SYSTEM RELEASE CODE " error. This has been fixed. Can we do the CSOR again? Please delete the pointer and I will re-add .

Also, what errors did you encountered with H7 linkages?

Please let me know.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

The CSOR completed although there were errors encountered with the H7 linkages. A UD message was sent back with the errors, which I gather is incorrect. Let me know your expectations on how this should have been handled.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Apparently I introduced a bug whereby no change in SSN on the UD caused a substitute SSN to be sent instead. Hence, the UD was returned in error. This will require a fix.

Would you like to jump back to Driver I? I deployed a fix for the NI so I should be able to retry test I3.

**CDM1.3 TRANSMISSION**

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,  
or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,  
or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,  
or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),  
or

manually notify the SOR/Old SOR of the error.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

This email comes from an external source, so remember, Think Before You Click!  
Gary,

As per Test Case # K6, AI initiates an Add Driver request that must contain information to create a duplicate pointer (CDLIS Indicator as 'Y' ) with the driver from Test Case # K5.

You have added a non-CDL pointer that has resulted in 'Type 7' duplicate.

The main intent of this Test Case is to make sure AI can send a Mark Unique Transaction to resolve the Duplicate when both the drivers belong to AI.

Can you please look.

Thanks,  
Asma

But, as per the following section in the SPEXS Master Specification, if errors are encounters on the H1 through H7 messages,  
 the Inquirer can return the parent message with the error block(s) explaining the error on the H1 through H7 messages  
 or return the H1 through H7 messages with the error block(s) explaining the error

### CDM1.3.1 Transmission

**CDM1.3 TRANSMISSION**

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,  
or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,  
or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,  
or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),  
or

manually notify the SOR/Old SOR of the error.

Can you please look.

Thanks,  
Asma

This email comes from an external source, so remember, Think Before You Click!

Gary,

You can delete the pointer, or if you want I can delete it too, just let me know the DLN.

Thanks,  
Asma

## NCB Block

**CDM1.3 TRANSMISSION**

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,  
or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,  
or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,  
or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),  
or

manually notify the SOR/Old SOR of the error.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

This email comes from an external source, so remember, Think Before You Click!  
Gary,

As per Test Case # K6, AI initiates an Add Driver request that must contain information to create a duplicate pointer (CDLIS Indicator as 'Y' ) with the driver from Test Case # K5.

You have added a non-CDL pointer that has resulted in 'Type 7' duplicate.

The main intent of this Test Case is to make sure AI can send a Mark Unique Transaction to resolve the Duplicate when both the drivers belong to AI.

Can you please look.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

The next test K6 is asking for a new pointer using doc type = 2 with the expectation an NA will be produced (with subsequent mark unique, etc). Would it be possible to add an ID pointer instead to exercise the possible duplicate scenario?

NCB Block

But, as per the following section in the SPEXS Master Specification, if errors are encountered on the H1 through H7 messages, the Inquirer can return the parent message with the error block(s) explaining the error on the H1 through H7 messages or return the H1 through H7 messages with the error block(s) explaining the error

### CDM1.3.1 Transmission

SPEXS Master Specification (AMIE), r6.0.9

AAMVA - Official Use Only

#### CDM1.3 TRANSMISSION

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error, or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error, or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message, or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s), or

manually notify the SOR/Old SOR of the error.

Can you please look.

Thanks,  
Asma

**CDM1.3 TRANSMISSION**

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,  
or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,  
or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,  
or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),  
or

manually notify the SOR/Old SOR of the error.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

This email comes from an external source, so remember, Think Before You Click!  
Gary,

As per Test Case # K6, AI initiates an Add Driver request that must contain information to create a duplicate pointer (CDLIS Indicator as 'Y' ) with the driver from Test Case # K5.

You have added a non-CDL pointer that has resulted in 'Type 7' duplicate.

The main intent of this Test Case is to make sure AI can send a Mark Unique Transaction to resolve the Duplicate when both the drivers belong to AI.

Can you please look.

Thanks,  
Asma

NCB Block

But, as per the following section in the SPEXS Master Specification, if errors are encountered on the H1 through H7 messages, the Inquirer can return the parent message with the error block(s) explaining the error on the H1 through H7 messages or return the H1 through H7 messages with the error block(s) explaining the error

### CDM1.3.1 Transmission

SPEXS Master Specification (AMIE), r6.0.9

AAMVA - Official Use Only

#### CDM1.3 TRANSMISSION

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error, or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error, or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message, or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s), or

manually notify the SOR/Old SOR of the error.

Can you please look.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

The pointer has been deleted.

The H7 validation returned errors NO MATCHING CONVICTION ID CODE IN H3 MESSAGE and REPEATED CONVICTION IDS IN CONVICTIONS LINKS GRP although I would have to examine H7/H3/H5 to see exactly what was amiss.

This email comes from an external source, so remember, Think Before You Click!  
Gary,

I see that H1, H2 and H3 were with "INVALID SYSTEM RELEASE CODE " error. This has been fixed. Can we do the CSOR again? Please delete the pointer and I will re-add .

Also, what errors did you encountered with H7 linkages?

Please let me know.

Thanks,  
Asma

The CSOR completed although there were errors encountered with the H7 linkages. A UD message was sent back with the errors, which I gather is incorrect. Let me know your expectations on how this should have been handled.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Apparently I introduced a bug whereby no change in SSN on the UD caused a substitute SSN to be sent instead. Hence, the UD was returned in error. This will require a fix.

Would you like to jump back to Driver I? I deployed a fix for the NI so I should be able to retry test I3.

**CDM1.3 TRANSMISSION**

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,  
or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,  
or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,  
or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),  
or

manually notify the SOR/Old SOR of the error.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

This email comes from an external source, so remember, Think Before You Click!  
Gary,

As per Test Case # K6, AI initiates an Add Driver request that must contain information to create a duplicate pointer (CDLIS Indicator as 'Y' ) with the driver from Test Case # K5.

You have added a non-CDL pointer that has resulted in 'Type 7' duplicate.

The main intent of this Test Case is to make sure AI can send a Mark Unique Transaction to resolve the Duplicate when both the drivers belong to AI.

Can you please look.

Thanks,  
Asma

---

**From:** Gary Tancik [<mailto:Gtancik@resdat.com>]

NCB Block

But, as per the following section in the SPEXS Master Specification, if errors are encountered on the H1 through H7 messages, the Inquirer can return the parent message with the error block(s) explaining the error on the H1 through H7 messages or return the H1 through H7 messages with the error block(s) explaining the error

### CDM1.3.1 Transmission

SPEXS Master Specification (AMIE), r6.0.9

AAMVA - Official Use Only

#### CDM1.3 TRANSMISSION

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error, or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error, or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message, or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s), or

manually notify the SOR/Old SOR of the error.

Can you please look.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

This email comes from an external source, so remember, Think Before You Click!  
Gary,

I see that H1, H2 and H3 were with "INVALID SYSTEM RELEASE CODE " error. This has been fixed. Can we do the CSOR again? Please delete the pointer and I will re-add .

Also, what errors did you encountered with H7 linkages?

Please let me know.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

The CSOR completed although there were errors encountered with the H7 linkages. A UD message was sent back with the errors, which I gather is incorrect. Let me know your expectations on how this should have been handled.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Apparently I introduced a bug whereby no change in SSN on the UD caused a substitute SSN to be sent instead. Hence, the UD was returned in error. This will require a fix.

Would you like to jump back to Driver I? I deployed a fix for the NI so I should be able to retry test I3.

## NCB Block

**CDM1.3 TRANSMISSION**

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,  
or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,  
or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,  
or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),  
or

manually notify the SOR/Old SOR of the error.

**Cc:** Singaraju, Sruti; Peters, Mina L (DOA)  
**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

That's correct Gary.

You just need to swap Driver Licenses.

Thanks,  
Asma

Gary,

Yes, the 1<sup>st</sup> UG ( for DLN '7685503) looks good :

	1707281006230004	37	CD	AI	XX
	1707281006230001	37	UG	XX	AI

Can you send the other UG message (for DLN '7685505') to complete the Mark Unique.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

This email comes from an external source, so remember, Think Before You Click!  
Gary,

As per Test Case # K6, AI initiates an Add Driver request that must contain information to create a duplicate pointer (CDLIS Indicator as 'Y' ) with the driver from Test Case # K5.

You have added a non-CDL pointer that has resulted in 'Type 7' duplicate.

The main intent of this Test Case is to make sure AI can send a Mark Unique Transaction to resolve the Duplicate when both the drivers belong to AI.

Can you please look.

Thanks,  
Asma

But, as per the following section in the SPEXS Master Specification, if errors are encounters on the H1 through H7 messages,  
 the Inquirer can return the parent message with the error block(s) explaining the error on the H1 through H7 messages  
 or return the H1 through H7 messages with the error block(s) explaining the error

### CDM1.3.1 Transmission

**CDM1.3 TRANSMISSION**

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,  
or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,  
or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,  
or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),  
or

manually notify the SOR/Old SOR of the error.

Can you please look.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Apparently I introduced a bug whereby no change in SSN on the UD caused a substitute SSN to be sent instead. Hence, the UD was returned in error. This will require a fix.

Would you like to jump back to Driver I? I deployed a fix for the NI so I should be able to retry test I3.

**CDM1.3 TRANSMISSION**

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,  
or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,  
or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,  
or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),  
or

manually notify the SOR/Old SOR of the error.

Asma, I have other obligations for the project today as well as fixes I need to make for this and other test cases. Can we pick this up tomorrow?

Hopefully we can then make progress on Driver I, K and L scenarios.

This email comes from an external source, so remember, Think Before You Click!  
Gary,

As per Test Case # K6, AI initiates an Add Driver request that must contain information to create a duplicate pointer (CDLIS Indicator as 'Y' ) with the driver from Test Case # K5.

You have added a non-CDL pointer that has resulted in 'Type 7' duplicate.

The main intent of this Test Case is to make sure AI can send a Mark Unique Transaction to resolve the Duplicate when both the drivers belong to AI.

Can you please look.

Thanks,  
Asma

But, as per the following section in the SPEXS Master Specification, if errors are encounters on the H1 through H7 messages,  
 the Inquirer can return the parent message with the error block(s) explaining the error on the H1 through H7 messages  
 or return the H1 through H7 messages with the error block(s) explaining the error

### CDM1.3.1 Transmission

**CDM1.3 TRANSMISSION**

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,  
or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,  
or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,  
or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),  
or

manually notify the SOR/Old SOR of the error.

Can you please look.

Thanks,  
Asma

## NCB Block

**CDM1.3 TRANSMISSION**

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,  
or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,  
or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,  
or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),  
or

manually notify the SOR/Old SOR of the error.

Ok. Would you like me to delete the pointer and re-add it with CDLIS indicator 'Y'?

This email comes from an external source, so remember, Think Before You Click!  
Gary,

As per Test Case # K6, AI initiates an Add Driver request that must contain information to create a duplicate pointer (CDLIS Indicator as 'Y' ) with the driver from Test Case # K5.

You have added a non-CDL pointer that has resulted in 'Type 7' duplicate.

The main intent of this Test Case is to make sure AI can send a Mark Unique Transaction to resolve the Duplicate when both the drivers belong to AI.

Can you please look.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

The next test K6 is asking for a new pointer using doc type = 2 with the expectation an NA will be produced (with subsequent mark unique, etc). Would it be possible to add an ID pointer instead to exercise the possible duplicate scenario?

But, as per the following section in the SPEXS Master Specification, if errors are encounters on the H1 through H7 messages,  
 the Inquirer can return the parent message with the error block(s) explaining the error on the H1 through H7 messages  
 or return the H1 through H7 messages with the error block(s) explaining the error

### CDM1.3.1 Transmission

**CDM1.3 TRANSMISSION**

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,  
or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,  
or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,  
or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),  
or

manually notify the SOR/Old SOR of the error.

Can you please look.

Thanks,  
Asma

**CDM1.3 TRANSMISSION**

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,  
or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,  
or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,  
or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),  
or

manually notify the SOR/Old SOR of the error.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

This email comes from an external source, so remember, Think Before You Click!

Gary,

As per Test Case # K6, AI initiates an Add Driver request that must contain information to create a duplicate pointer (CDLIS Indicator as 'Y' ) with the driver from Test Case # K5.

You have added a non-CDL pointer that has resulted in 'Type 7' duplicate.

The main intent of this Test Case is to make sure AI can send a Mark Unique Transaction to resolve the Duplicate when both the drivers belong to AI.

Can you please look.

Thanks,  
Asma

Gary,

We can continue with Driver K and come back to this Test Case once the issue is fixed and re-test.

Let me know if this is ok with you.

Thanks,  
Asma

**NCB Block**

But, as per the following section in the SPEXS Master Specification, if errors are encountered on the H1 through H7 messages, the Inquirer can return the parent message with the error block(s) explaining the error on the H1 through H7 messages or return the H1 through H7 messages with the error block(s) explaining the error

### CDM1.3.1 Transmission

SPEXS Master Specification (AMIE), r6.0.9

AAMVA - Official Use Only

#### CDM1.3 TRANSMISSION

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error, or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error, or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message, or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s), or

manually notify the SOR/Old SOR of the error.

Can you please look.

Thanks,  
Asma

This email comes from an external source, so remember, Think Before You Click!

Gary,

When the IN message was sent initially, it was sent with Last Name as 'AIAAIS2SEXCHGDRIVERK'.

Driver K's last name is 'AIS2SEXCHGDRIVERK'.

Thanks,  
Asma

**CDM1.3 TRANSMISSION**

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,  
or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,  
or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,  
or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),  
or

manually notify the SOR/Old SOR of the error.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

This email comes from an external source, so remember, Think Before You Click!  
Gary,

As per Test Case # K6, AI initiates an Add Driver request that must contain information to create a duplicate pointer (CDLIS Indicator as 'Y' ) with the driver from Test Case # K5.

You have added a non-CDL pointer that has resulted in 'Type 7' duplicate.

The main intent of this Test Case is to make sure AI can send a Mark Unique Transaction to resolve the Duplicate when both the drivers belong to AI.

Can you please look.

Thanks,  
Asma

---

Gary,

When the CSOR was first initiated, AI sent the UD back in error to P3 (OSOR) with the error :

251019999 99NO MATCHING CONVICTION ID CODE IN H3 MESSAGE  
251029999 99REPEATED CONVICTION IDS IN CONVICTIONS LINKS GRP

NCB Block

But, as per the following section in the SPEXS Master Specification, if errors are encounters on the H1 through H7 messages,  
the Inquirer can return the parent message with the error block(s) explaining the error on the H1 through H7 messages  
or return the H1 through H7 messages with the error block(s) explaining the error

### CDM1.3.1 Transmission

**CDM1.3 TRANSMISSION**

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,  
or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,  
or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,  
or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),  
or

manually notify the SOR/Old SOR of the error.

Can you please look.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

The pointer has been deleted.

The H7 validation returned errors NO MATCHING CONVICTION ID CODE IN H3 MESSAGE and REPEATED CONVICTION IDS IN CONVICTIONS LINKS GRP although I would have to examine H7/H3/H5 to see exactly what was amiss.

Gary,

I see that H1, H2 and H3 were with "INVALID SYSTEM RELEASE CODE " error. This has been fixed. Can we do the CSOR again? Please delete the pointer and I will re-add .

Also, what errors did you encountered with H7 linkages?

Please let me know.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Apparently I introduced a bug whereby no change in SSN on the UD caused a substitute SSN to be sent instead. Hence, the UD was returned in error. This will require a fix.

Would you like to jump back to Driver I? I deployed a fix for the NI so I should be able to retry test I3.

## NCB Block

**CDM1.3 TRANSMISSION**

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,  
or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,  
or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,  
or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),  
or

manually notify the SOR/Old SOR of the error.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

This email comes from an external source, so remember, Think Before You Click!  
Gary,

As per Test Case # K6, AI initiates an Add Driver request that must contain information to create a duplicate pointer (CDLIS Indicator as 'Y' ) with the driver from Test Case # K5.

You have added a non-CDL pointer that has resulted in 'Type 7' duplicate.

The main intent of this Test Case is to make sure AI can send a Mark Unique Transaction to resolve the Duplicate when both the drivers belong to AI.

Can you please look.

Thanks,  
Asma

---

 NCB Block

But, as per the following section in the SPEXS Master Specification, if errors are encountered on the H1 through H7 messages,

the Inquirer can return the parent message with the error block(s) explaining the error on the H1 through H7 messages or return the H1 through H7 messages with the error block(s) explaining the error

### CDM1.3.1 Transmission

**CDM1.3 TRANSMISSION**

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,  
or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,  
or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,  
or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),  
or

manually notify the SOR/Old SOR of the error.

Can you please look.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

The pointer has been deleted.

The H7 validation returned errors NO MATCHING CONVICTION ID CODE IN H3 MESSAGE and REPEATED CONVICTION IDS IN CONVICTIONS LINKS GRP although I would have to examine H7/H3/H5 to see exactly what was amiss.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Apparently I introduced a bug whereby no change in SSN on the UD caused a substitute SSN to be sent instead. Hence, the UD was returned in error. This will require a fix.

Would you like to jump back to Driver I? I deployed a fix for the NI so I should be able to retry test I3.

## NCB Block

**CDM1.3 TRANSMISSION**

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,  
or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,  
or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,  
or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),  
or

manually notify the SOR/Old SOR of the error.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Gary,

Before the CSOR, Driver K was with 50 Accidents, 50 Convictions, 50 Withdrawals and 50 Linkages on his record.

After the CSOR, on the HC message Total Accidents/Convictions/Withdrawals on Records are '00' :

TOTAL ACCIDENTS ON RECORD	1	00
TOTAL ACCIDENTS SENT	1	00
TOTAL ACD CONVICTIONS ON RECORD	1	00
TOTAL CONVICTIONS SENT	1	00
TOTAL WITHDRAWALS ON RECORD	1	00
TOTAL WITHDRAWALS SENT	1	00

Can you please look...

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

This email comes from an external source, so remember, Think Before You Click!  
Gary,

As per Test Case # K6, AI initiates an Add Driver request that must contain information to create a duplicate pointer (CDLIS Indicator as 'Y' ) with the driver from Test Case # K5.

You have added a non-CDL pointer that has resulted in 'Type 7' duplicate.

The main intent of this Test Case is to make sure AI can send a Mark Unique Transaction to resolve the Duplicate when both the drivers belong to AI.

Can you please look.

Thanks,  
Asma

---

But, as per the following section in the SPEXS Master Specification, if errors are encountered on the H1 through H7 messages, the Inquirer can return the parent message with the error block(s) explaining the error on the H1 through H7 messages or return the H1 through H7 messages with the error block(s) explaining the error

### CDM1.3.1 Transmission

SPEXS Master Specification (AMIE), r6.0.9

AAMVA - Official Use Only

#### CDM1.3 TRANSMISSION

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error, or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error, or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message, or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s), or

manually notify the SOR/Old SOR of the error.

Can you please look.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

The pointer has been deleted.

The H7 validation returned errors NO MATCHING CONVICTION ID CODE IN H3 MESSAGE and REPEATED CONVICTION IDS IN CONVICTIONS LINKS GRP although I would have to examine H7/H3/H5 to see exactly what was amiss.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Apparently I introduced a bug whereby no change in SSN on the UD caused a substitute SSN to be sent instead. Hence, the UD was returned in error. This will require a fix.

Would you like to jump back to Driver I? I deployed a fix for the NI so I should be able to retry test I3.

#### NCB Block

**CDM1.3 TRANSMISSION**

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,  
or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,  
or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,  
or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),  
or

manually notify the SOR/Old SOR of the error.

This email comes from an external source, so remember, Think Before You Click!

Gary,

Before the CSOR, Driver K was with 50 Accidents, 50 Convictions, 50 Withdrawals and 50 Linkages on his record.

After the CSOR, on the HC message Total Accidents/Convictions/Withdrawals on Records are '00' :

TOTAL ACCIDENTS ON RECORD	1	00
TOTAL ACCIDENTS SENT	1	00
TOTAL ACD CONVICTIONS ON RECORD	1	00
TOTAL CONVICTIONS SENT	1	00
TOTAL WITHDRAWALS ON RECORD	1	00
TOTAL WITHDRAWALS SENT	1	00

Can you please look...

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

This email comes from an external source, so remember, Think Before You Click!

Gary,

As per Test Case # K6, AI initiates an Add Driver request that must contain information to create a duplicate pointer (CDLIS Indicator as 'Y' ) with the driver from Test Case # K5.

You have added a non-CDL pointer that has resulted in 'Type 7' duplicate.

The main intent of this Test Case is to make sure AI can send a Mark Unique Transaction to resolve the Duplicate when both the drivers belong to AI.

Can you please look.

Thanks,  
Asma

But, as per the following section in the SPEXS Master Specification, if errors are encountered on the H1 through H7 messages, the Inquirer can return the parent message with the error block(s) explaining the error on the H1 through H7 messages or return the H1 through H7 messages with the error block(s) explaining the error

### CDM1.3.1 Transmission

SPEXS Master Specification (AMIE), r6.0.9

AAMVA - Official Use Only

#### CDM1.3 TRANSMISSION

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error, or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error, or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message, or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s), or

manually notify the SOR/Old SOR of the error.

Can you please look.

Thanks,  
Asma

The pointer has been deleted.

The H7 validation returned errors NO MATCHING CONVICTION ID CODE IN H3 MESSAGE and REPEATED CONVICTION IDS IN CONVICTIONS LINKS GRP although I would have to examine H7/H3/H5 to see exactly what was amiss.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Apparently I introduced a bug whereby no change in SSN on the UD caused a substitute SSN to be sent instead. Hence, the UD was returned in error. This will require a fix.

Would you like to jump back to Driver I? I deployed a fix for the NI so I should be able to retry test I3.

## NCB Block

**CDM1.3 TRANSMISSION**

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error,  
or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error,  
or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message,  
or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s),  
or

manually notify the SOR/Old SOR of the error.

---

This email comes from an external source, so remember, Think Before You Click!

Gary,

Before the CSOR, Driver K was with 50 Accidents, 50 Convictions, 50 Withdrawals and 50 Linkages on his record.

After the CSOR, on the HC message Total Accidents/Convictions/Withdrawals on Records are '00' :

TOTAL ACCIDENTS ON RECORD	1	00
TOTAL ACCIDENTS SENT	1	00
TOTAL ACD CONVICTIONS ON RECORD	1	00
TOTAL CONVICTIONS SENT	1	00
TOTAL WITHDRAWALS ON RECORD	1	00
TOTAL WITHDRAWALS SENT	1	00

Can you please look...

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

This email comes from an external source, so remember, Think Before You Click!

Gary,

As per Test Case # K6, AI initiates an Add Driver request that must contain information to create a duplicate pointer (CDLIS Indicator as 'Y' ) with the driver from Test Case # K5.

You have added a non-CDL pointer that has resulted in 'Type 7' duplicate.

The main intent of this Test Case is to make sure AI can send a Mark Unique Transaction to resolve the Duplicate when both the drivers belong to AI.

Can you please look.

Thanks,  
Asma

**NCB Block**

But, as per the following section in the SPEXS Master Specification, if errors are encountered on the H1 through H7 messages, the Inquirer can return the parent message with the error block(s) explaining the error on the H1 through H7 messages or return the H1 through H7 messages with the error block(s) explaining the error

### CDM1.3.1 Transmission

SPEXS Master Specification (AMIE), r6.0.9

AAMVA - Official Use Only

#### CDM1.3 TRANSMISSION

If the inquirer encounters errors in the Driver History Response (HB) Message, the inquirer either

- returns the Driver History Response (HB) Message in error, or
- manually notifies the SOR of the error.

If the inquirer encounters errors in the CSOR Driver History Response (HD) Message in Error, the inquirer either

- returns the CSOR Driver History Response (HD) Message in Error in error, or
- manually notifies the SOR of the error.

If the inquirer finds an error on a Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message, the inquirer must do one of the following:

- return the corresponding Driver History Response (HB) Message with error block(s) explaining the error(s) on the Driver Record Supplement (H1) Message through the Driver History Withdrawal-Conviction Links (H7) Message, or
- return the erroneous Driver Record Supplement (H1) Message through Driver History Withdrawal-Conviction Links (H7) Message with error block(s) explaining the error(s), or

manually notify the SOR/Old SOR of the error.

Can you please look.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

The pointer has been deleted.

The H7 validation returned errors NO MATCHING CONVICTION ID CODE IN H3 MESSAGE and REPEATED CONVICTION IDS IN CONVICTIONS LINKS GRP although I would have to examine H7/H3/H5 to see exactly what was amiss.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Apparently I introduced a bug whereby no change in SSN on the UD caused a substitute SSN to be sent instead. Hence, the UD was returned in error. This will require a fix.

Would you like to jump back to Driver I? I deployed a fix for the NI so I should be able to retry test I3.

Gary,

Driver K added, please proceed with # K1.

Thanks,

**Asma Syeda**, CSM
